craig deegan s financial accounting theory provides a concise approach while comprehensively covering both traditional and contemporary theories that have emerged as the practice of accounting has evolved social and environmental accountability and reporting issues are discussed in depth along with coverage of critical perspectives public sector accounting and fair value instructors and students value financial accounting theory for its reader friendly style using straightforward explanations and numerous practical examples this new edition continues to follow this approach with the addition of new content focusing on how different perspectives of organisational responsibilities and accountabilities impact the way accounting is performed and the theories that different researchers choose to use apply

we have spent a great deal of time on the continued development of accounting and auditing standards which are used as a primary component of corporate reporting to reach today s financial reporting framework however is it possible to say that currently financial statements provide full and prompt disclosure or will they still be useful as a primary element with their current structures in corporate reporting undoubtedly we are deeply concerned about these issues in recent times this volume contains chapters to discuss the today s and tomorrow s accounting and corporate reporting phenomena in a comprehensive and multidimensional way therefore this book is organized into six sections achieving sustainability through corporate reporting international standardization financial reporting quality accounting profession and behavioral aspects public sector accounting and reporting and managerial accounting

financial accounting reporting and regulation is a vast subject area of huge global importance with interest rising significantly in the light of the ongoing global financial crisis the authors begin with a broad overview of the subject of accounting setting the stage for a discussion on the theoretical and practical issues and debates regarding financial reporting which are expanded on in the second part of the book this includes how to define the reporting entity recognition and measurement of the elements of financial statements fair values in financial reporting and the costs and benefits of disclosure the third part assesses the interest need and theories behind the accounting reporting and regulation

industry while parts four and five look at the institutional social and economic aspects with issues such as accounting for environmental management and accounting regulation and financial reporting in islamic countries both issues of ever increasing importance this authoritative companion presents a broad overview of the state of these disciplines today and will provide a comprehensive reference source for students and academics involved in accounting regulation and reporting

financial accounting theory and analysis text and cases 13th edition illustrates how accounting standards impact the daily decisions of accounting professionals this authoritative textbook shows how accounting theory explains why particular companies select certain accounting methods over others and predicts the attributes of firms by analyzing their accounting methods the text examines empirical research relevant to various theories of accounting and the uses of accounting information including the fundamental analysis model the efficient markets hypothesis the behavioral finance model the positive accounting theory model the human information processing model and the value creation model enabling students to develop an informed perspective on accounting theory the text reviews the development and current state of accounting theory and summarizes current disclosure requirements for various financial statement items the new edition has been fully revised to reflect current methods of accounting education including the incorporation of ethics into the curriculum the analysis of a company s quality of earnings and sustainable income the use of the internet as a source of information the international dimensions of accounting and more designed for undergraduate and graduate accounting majors the text aligns with the latest curriculum changes in the cpa exam

this book is the first of the two volumes featuring selected articles from the 14th eurasia business and economics conference held in barcelona spain in october 2014 peer reviewed articles in this first volume present latest research breakthroughs in the areas of accounting corporate governance finance and banking institutional and international economics and regional studies the contributors are both distinguished and young scholars from different parts of the world

creating the big mess and its sequel accounting for crises use marx s theory of capitalism to explain why there is no generally accepted theory of financial

accounting and explore the consequences by studying the history of american accounting theory from c 1900 to 2007 the answer creating the big mess is first that while late 19th century british accounting principles founded on the going concern concept provided an objective basis for holding management accountable to shareholders for its stewardship of capital and were accepted by the nascent american profession they are inchoate second irving fisher s economic theory of accounting based on the assertion that present value is the accountants measurement ideal which is subjective framed early 20th century american accounting theory which undermined british principles making them incoherent in an unregulated pro business environment leading theorists particularly henry rand hatfield and william a paton jr became authorities for management discretion creating the big mess hatfield saw in late 1920s american accounting accounting for crises examines the roles of fisher s theory in promoting the speculation leading to the 1929 great crash aggravating the great depression hindering accounting regulation from the 1930s producing the financial accounting standard board s conceptual framework and facilitating the 2007 2008 global financial crisis

serves as an excellent review material for the financial portion of the cpa exam provides alternatives to current practice evaluate conclusions reached by apb and fasb using readings and research documented at the end of each chapter

nils eikelmann describes the framework conditions for the application of value based performance measures and critically analyses selected ones the disclosure of value based performance indicators is important in order to demonstrate the successful management of a company and to satisfy the increasing information needs of investors however companies adapt the developed theoretical concepts of value based performance measures to their practical needs and thus investors are no longer able to compare the performance of companies in addition there is a variety of different metrics from which companies can choose the empirical study aims to reduce existing research gaps and is divided into three parts the analysis of annual reports of selected european companies the calculation of a standardised value based performance measure and a value relevance study in the form of an association study
